MICROSOFT VIRTUAL MACHINE README

To install the virtual machine follow these instructions:

- Open up the MSVM.exe file
- Accept the license agreement
- It will install the Microsoft Virtual Machine and then ask to reboot, tell it not to reboot
- Follow steps 2 & 3 for the second and third box.
- After completely installing the virtual machine, go to Start, Settings, Control panel and click on Internet Options. Click on the advanced tab and look for a category that says "Microsoft VM" and make sure the "JIT compiler for virtual machine enabled (requires restart)" is checked.
- Virtual machine will now work with no problems. If problems do occur reboot the computer and try it again.
